ABOUT GEOCARPET

Geocarpet company, which started its activities in 2017, continues production with an innovative approach in both outdoor and indoor decorative carpet sectors in its headquarters in Ankara. While producing with a dynamic perspective as required by the developing world, it serves its customers with the pride of continuous success. More than 100 color and pattern options registered within its structure; it works with the philosophy of solution partnership by managing the needs and wishes of its customers at all stages: from raw material to production, from production to sales and application.

For Geocarpet, the ultimate goal in production is to understand the lifestyle, needs and tastes of customers correctly and offer them unique products. With its environmentally friendly production model, it meets the needs of education, entertainment, trade, living center and public sectors with a continuously expanding product range.

Geocarpet runs its productions in a 30.000 m² closed production area, in total production site of 60.000 m².

Geocarpet has the quality certificates that provide guidelines for increasing customer satisfaction in all products and services we offer to our customers, including planning, design and production.

Geocarpet offers you the perfect living spaces where all your needs and tastes are considered.

OUR GROUP

Geoplas started off as a private company with the title of Sadık Şerefoğlu in 1990. Today we celebrate our 31st anniversary, and continue to work in our fully integrated facility that is able to produce all of the geosynthetic products under one roof with our experienced and young staff. With our group companies, we produce auxiliary materials in the construction, animal husbandry, shoes, carpet and home furniture sectors. Working with a very agile system to meet the needs of the domestic and international markets, Geoplas exports to more than 50 countries in 6 continents, strengthening its share in the market day by day.

In addition to our experienced staff of 400 people, the group companies that carry out high-level R&D projects work with the principle of being beneficial to future generations.

Geocarpet

Geocarpet manufactures products that can be customized according to customer needs in its facility where outdoor carpets and decorative indoor carpets can be produced together.

Geoplas

Geoplas develops high quality materials for large-scale construction and infrastructure projects with its capacity to produce all geosynthetics under a single roof.

Geoclay

Geoclay serves with a wide range of products from casting industry to pet products, drilling bentonite and insulating materials (GCL) with its facilities processing bentonite extracted from mines operated by the Geoplas group since 2017.

Kunplas

Kunplas manufactures natural and synthetic fiber products used in the shoemaking industry since 2010.
